

Assignment – 3

Subject Name	Subject Code	Issue Date	Due Date
Computer Organization and Architecture	01CE1402	07-04-2025	17-04-2025

Que. No.	Question	CO	Bloom's Level
1	Perform multiplication using booth algorithm for $(-13) * (+5)$.	CO3	Evaluate
2	Analyze the working of a BCD adder circuit with the help of a neat block diagram. Explain how the circuit corrects invalid BCD sums.	CO3	Analyze
3	Apply the handshaking method to illustrate how data is transferred between a source and destination device in a source-initiated transfer system.	CO4	Apply
4	Analyze the working of a Direct Memory Access (DMA) controller with the help of a neat block diagram.	CO4	Analyze
5	Distinguish between SRAM vs DRAM	CO4	Analyze
6	Apply the concept of virtual memory to explain the relationship between address space and memory space in a virtual memory system with a suitable example.	CO4	Apply

Prof. Dhara Joshi
Subject In charge
Computer Engineering

Prof. (Dr.) Krunal Vaghela
Head of Department
